

IDEATION PHASE

Brainstorming and Idea Prioritization Template

Date	31 October 2025
Project Title	CRM Application for Jewel Management
Team Id	5C726FBC80DF9BA96244FB7712CD1C0D

1. Problem Statement

Describe the main issue or challenge you are trying to solve.

Example:

Jewellery businesses face difficulties in managing inventory, customer relationships, and sales operations efficiently using manual systems.

2. Brainstorming Session

Idea No.	Proposed Idea	Description / Features	Advantages	Limitations
1	Desktop-based Inventory System	Manage stock and billing locally using a computer-based system.	Simple to build and easy for offline use.	No cloud access, limited scalability.
2	Web Portal for Jewellery Sales	Customers can browse and order jewellery online.	Expands customer reach, supports online transactions.	Focuses only on sales, lacks CRM features.
3	Salesforce-based CRM Application for Jewel Management	Cloud-based system for managing customers, sales, and inventory in one platform.	Secure, automated, real-time updates, scalable.	Requires Salesforce setup and customization.

3. Idea Evaluation Criteria

Criteria	Weight (1–5)	Description
Feasibility	5	How easily the idea can be implemented technically and financially.

Innovation	4	How unique or creative the idea is compared to existing systems.
Impact	5	How much the idea improves business processes or user experience.
Scalability	4	How well the solution can grow with business expansion.
Resource Availability	3	Whether required tools, skills, and data are available.

4. Idea Scoring Table

Idea No.	Feasibility (×5)	Innovation (×4)	Impact (×5)	Scalability (×4)	Resource (×3)	Total Score
1	3×5 = 15	2×4 = 8	3×5 = 15	2×4 = 8	5×3 = 15	61
2	4×5 = 20	3×4 = 12	4×5 = 20	3×4 = 12	4×3 = 12	76
3	5×5 = 25	4×4 = 16	5×5 = 25	5×4 = 20	4×3 = 12	98

5. Final Idea Selection

Selected Idea: Salesforce-based CRM Application for Jewel Management

Reason for Selection:

This idea scored the highest based on feasibility, impact, and scalability. It provides a cloud-based, secure, and automated solution that can streamline jewellery business operations efficiently.

6. Next Steps

- Define functional modules (Customer, Product, Order, Price Book, Reports).
- Design Salesforce objects and relationships.
- Implement automation using Flows, Validation Rules, and Dashboards.
